

Tips and Considerations Designed to Help You Prepare for Your Move:

1. Prior to moving day, separate any items that you plan to take with you. Place items in a corner with a "do not move" sign or in your car and inform the movers of the pile during the initial walk through.
2. If possible, please utilize common sized moving boxes. Smaller shipping sized boxes can often be misplaced or increase the time length of the move. Please also refrain from using **trash bags** as a moving container.
3. Use or properly dispose of all perishables, liquids, and flammables. Drain all gas from lawn mowers, machinery, etc.
4. Items that cannot be moved:
 - Live animals
 - Auto fluids
 - Chemicals
 - Cleaning supplies
 - Flammables
 - Liquids
 - Paint
 - Pesticides
 - Narcotics and paraphernalia
5. Disconnect and drain washer and dryer prior to moving day, unless arrangements have been made with Eagleview Solutions to provide that service.
6. Empty, defrost, and dry refrigerator/freezer if applicable.
7. Gather all valuable items such as jewelry, mementos, family heirlooms, etc. and secure in a safe location prior to moving day.
8. Please keep pathways open and clear for crews to operate efficiently.
9. Set aside any items you may want during the move such as coffee pot and filters, cups, cleaning supplies, toilet and facial tissues, etc.
